

VIKING™ THE WORLDWIDE DIVING STANDARD

Diving is a hazardous occupation. That is why safety is the most important issue for us at Ansell when designing and producing VIKING™ diving suits. But isn't functionality as important? Of course – we see functionality as the most important aspect of safety.

A diving suit that works the way it should is perhaps the best safety assurance the professional diver can get. In fact we like to think of it as a standard. The worldwide diving standard.
