LOGSUB

Projects and Logistics Solutions

100% Brazilian

LOGSUB is a Brazilian Company founded in 2008 and specialized in the management and control of ship repairs, implementation of Public Private Partnership projects in the Defense sector, in the area of Submarine Escape and Rescue, Recovery and Underwater Activities and Nationalization of items and systems for ships and submarines in partnership with other national companies. We develop logistics projects for the Brazilian Navy and other Latin American countries, as well as offer various services to naval units and to the Offshore market.

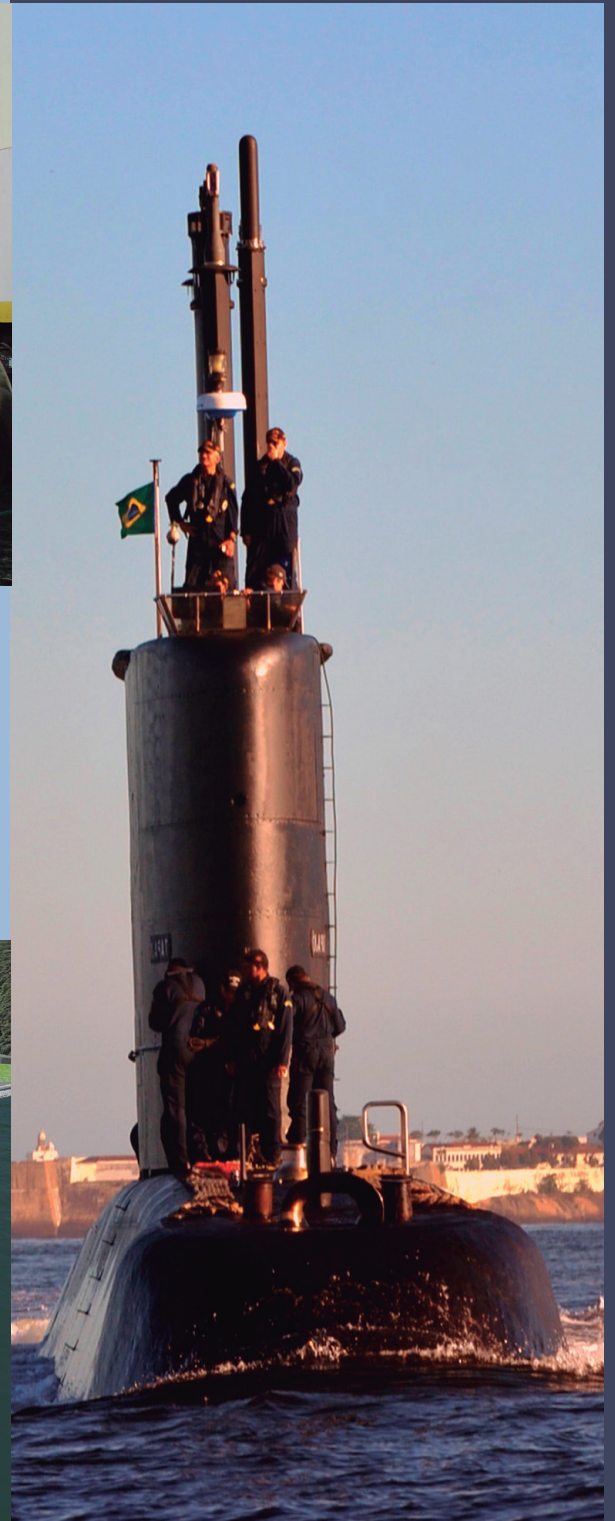

LOGSUB is affiliated to ABIMDE (Brazilian Association of Defence Material Industries) and SMERAS (Submarine Escape, Rescue and Abandonment Systems).

The Company presented to the Brazilian Navy a complete project of a Submarine Rescue System based on two types of rescue vehicles, rescue bell or the independent, transportable by air, with high mobility and high speed of mobilization.

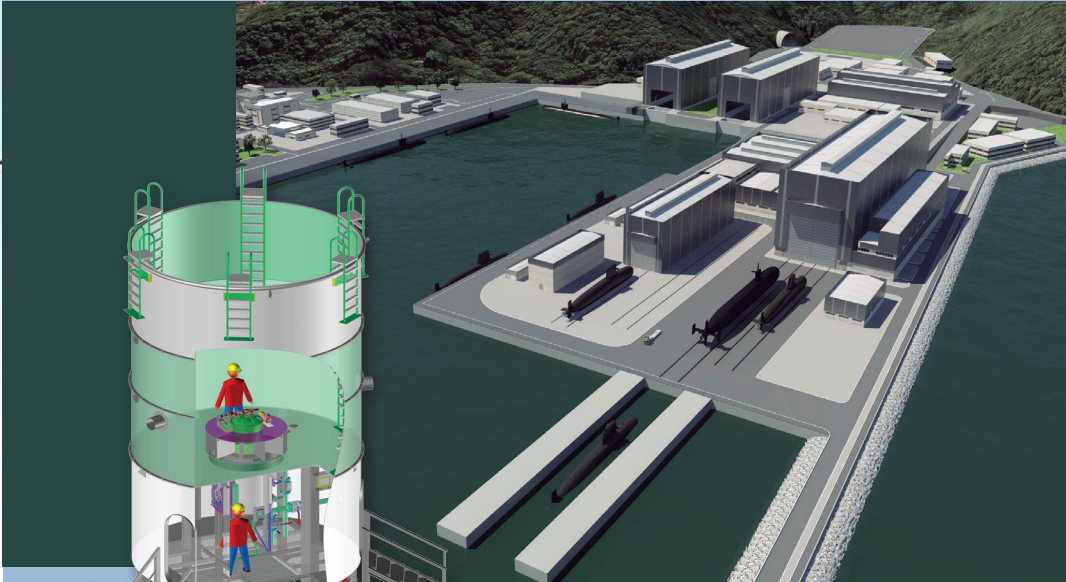

Shiplift and Transfer System for ships and submarines of the Shipyard and Naval Base of Itaguaí.

Modernization and Repowering of the Tupi and Tikuna class Submarines of the Brazilian Navy.

Project of the new SETT (Submarine Escape Training Tank) and Flooding Simulator for submarines in the Shipyard and Naval Base of Itaguaí.
