

Confidence Under Pressure

JFD offers a comprehensive range of products and services for defence divers. Our Divex range of rebreathers has been designed to integrate seamlessly with our SEAL Pod range of swimmer delivery vehicles.

The Divex range of rebreathers, each optimised for particular diver tasks or mission profiles can be tailor made to user specification. This includes low magnetic and acoustic, closed and semi-closed oxygen and nitrox rebreathers.

Divex Rebreathers

- Stealth CDLSE
- Stealth SC
- Shadow Enforcer
- Shadow Excursion

The SEAL Pod range of swimmer delivery vehicles integrate perfectly with the Divex range of rebreathers to provide reliable, through mission life support.

For example, Sub SEAL passengers can connect their Shadow Enforcer breathing sets to the onboard gas system during transit. Upon leaving the vehicle, divers can seamlessly switch to using their fully charged rebreathers.

The SEAL Pod

- SEAL Carrier deployed from a surface vessel.
- Sub SEAL deployed from host submarine.
- Torpedo SEAL deployed from host submarine's torpedo tube.
